Downstream	USB-C Female
Max power	PD 240W (48V/5A)
Material / Color	Aluminum Alloy / Black

Description:

UNITEK DataShield USB-C Data Blocker Adapter physically blocks data transfer during charging in public areas. It absolutely protects your devices against data leaks and guards against data theft, ensuring your personal information remains secure from unauthorized access when using charging stations in public. Furthermore, it supports a maximum of 240W (48V/5A) power charging for your devices, providing a safe and fast charging experience while safeguarding your devices wherever you go.

Product Features:

- **Prevent Data Theft:** Simply connect this Data Blocker before linking your device to any charging station/ power source, rental power bank, or third-party device in public areas such as hotels, airports, and coffee shops. This adapter eliminates all data transmission risks, allowing only power to pass through for charging your devices. It effectively blocks any malware or hacking attempts during charging to protect your privacy.
- **Ultra-Fast Charging:** Supports up to PD 240W (48V/5A), delivering super-fast charging speeds via this USB-C adapter. Enjoy a safe, secure, and fast charging experience wherever you go.
- **Compact and Portable:** With a small and lightweight design, this adapter easily fits into your pocket, bag, or on your keychain. It's perfect for those on the go or anyone using public charging stations at airports, hotels, and coffee shops.
- **Wide Compatibility:** UNITEK DataShield USB-C Data Blocker Adapter works seamlessly with all USB-C devices, including Apple MacBooks, Windows laptops, iPads, Android tablets, iPhones, and other USB-C devices. No drivers, apps, or settings are needed.
