Axium AX-1255

What happens when the team sits down to discuss a new multi zone amplifier, the key element being you would be proud to have the amplifier in your own home.

The fundamental objective was to deliver musicality. What is the benefit if the amplifier introduced its own signature. We set out to improve everything that elevated sonic performance so you can listen with out compromise.

Flexibility, with superior DSP functionality to cope with modern listening environments.

Reducing the products footprint required reducing dissipation - improving efficiency without compromising performance.

Longevity is achieved by adopting a professional amplifier topology, life time modeling of 10year continuous operation, all zones operating at full power, 24hours a day 7 days a week, music will playing for many years.

The culmination of 3 year of design work we are proud to present the Axium AX-1255, plenty of power with the technology to drive speakers over long cable runs, plenty of functionality to keep the most discerning listener happy for many years.

Axiu m AX-1255

Axiu AX-1255

Latest Digital Amplifier technology with balanced drive, improving speaker control on long speaker runs.

Inter zone audio playback synchronization with a new precision time stamp system keeping playback in sync across all zones.

Auto discovery system for auto configuration and connection to other Axiu amplifiers and the Axiu auto setup app.

8 zone, replacing the AX-1250

6 powered zones, 110 Watt per zone 55w PCH

2 Preamp out zones, fixed or adjustable outputs, filterable for a Powered Sub Front panel touchscreen for setup and control. Significant sonic improvement with improved noise and distortion.

Trap door in amplifier base for internal media player.

Trigger out for higher powered amplifier/subwoofer

7 band Parametric EQ per channel

Digital delay line settings for each source and zone

8 source

- 4 Analogue**

- 2 coax**

- 2 optical**

Clock support for alarm settings

Keypad ports

Buffered IR out

15 Presets

User adjustable source and zone names and many other setup features to many to list.

½ rack width 1U high
