Description:

UNITEK 8K DisplayPort 1.4 Fiber Optic Cable delivers 32.4Gbps of lossless bandwidth, making it the definitive choice for professional workstations and high-end theater integrations where performance cannot be sacrificed.

Product Features:

- **Ultra Smooth Visuals:** High-performance signal processing enables a maximum transmission resolution of stunning 8K at 60Hz or 4K at 144Hz. Experience breathtakingly clear and fluid on-screen motion, making it ideal for demanding high-definition gaming and professional video editing.
- **No Extra Power Required:** Advanced built-in technology drives up to 32.4Gbps of bandwidth directly through the connection without bulky external power supplies. Enjoy a clean, clutter-free setup that instantly delivers reliable, top-tier performance as soon as it is plugged in
- **Long Distance Reliability:** A hybrid structure of OM2 optical fiber and copper core actively prevents signal loss over 5 to 30 meters. You can effortlessly arrange your room and place your devices exactly where you want them without sacrificing picture quality.
- **Universal Display Connectivity:** The gold-plated DisplayPort 1.4 interface resists oxidation and improves signal efficiency while maintaining compatibility with older standard. You can easily connect to various modern or legacy monitors, projectors, and game consoles with perfect reliability.
- **Premium Hardware Protection:** An included DisplayPort interface cover safeguards the delicate connectors from dust and physical damage when not actively plugged in. Rest easy knowing your investment is protected against everyday wear and tear, ensuring a long lifespan for your setup.
