

High-Sensitivity Portable Door Stopper Alarm

Instant Trigger & Dual Sensitivity mode

 **Auto-Trigger Response**
Real-Time Breach Activation

 **80-120dB**
Shockwave Speaker

 **Dual adjustable Sensitivity Levels**

DoorShield is a compact and versatile door and window security alarm designed to deliver instant protection across multiple entry points. Equipped with dual adjustable sensitivity levels, it adapts easily to homes, hotel rooms, AirBnB rooms, dorms, and travel spaces. Once activated, DoorShield's alarm sets after ten seconds and responds instantly when pressure or forced movement is detected, triggering a powerful 80-120dB sound to deter intruders and alert occupants. The integrated silicone loop allows secure mounting on door or window handles without tools. Powered by two AAA batteries and housed in a durable PC and ABS enclosure, DoorShield delivers dependable, portable security wherever added safety is required.

Door-Blocking Forced Entry Protection:

Functions as a door stopper with a sloped, high-friction design that resists inward pressure. Any attempt to force the door open immediately activates the alarm for instant intrusion deterrence.

Door & Window Handle Security Use:

Easily hangs on door or window handles using the integrated silicone loop. In high-sensitivity mode it detects handle movement and triggers a loud alarm the moment an entry attempt is made.

Immediate Contact Detection:

Activates the alarm the moment pressure or movement is detected, providing real-time intrusion alerts without delays, apps, or reliance on external connectivity.

Custom Sensitivity Adaptation:

Features two selectable sensitivity levels to suit different door and window types, helping ensure reliable detection while minimizing false alarms.

Travel-Ready Portable Security:

Lightweight and compact design makes it easy to carry and deploy anywhere, providing reliable personal safety in hotels, Airbnb stays, dorms, and temporary accommodations while traveling.

Simple Battery Maintenance:

Powered by two standard AAA batteries, allowing quick replacement and hassle-free maintenance without charging downtime for continuous, dependable protection.

Specifications:

Input Voltage: 2.2-3.5 V
Power Source: 2 x AAA batteries
Speaker Diameter: 27 mm
Sound Output: 80-120 dB

Operating Time: Up to 60 minutes
Dimensions: 48.07 x 29.85 x 98.08 mm (L x W x H)
Weight: 56.5 g
Materials: PC + ABS, Silicone

Packaging Content:

- DoorShield
- AAA Battery x2
- Quick Guide

Certifications:

 **Integrated Silicone Loop**
for door & window handle mounting

 **Battery Powered**

 **Auto Trigger Activation**
