

Portable Anti-Peep IR Camera Detector with Trigger Alarm & Flashlight

**Hidden Camera
Detection**

**Anti-Theft
Alert**

**Dual-Mode Red
Light Scanning**

**Ultra-Compact &
Travel-Friendly**

InfraSense

InfraSense is a compact, intelligent anti-peep camera detector built to protect your privacy anywhere. Ideal for hotels, Airbnbs, dorms, and temporary stays, it detects hidden cameras in low-light environments using advanced infrared technology. The IR lens reveals concealed camera sensors, while a red-light filter enhances lens reflections for quick confirmation. It also doubles as a personal safety device, featuring a vibration motion alarm and a loud 80 dB alert for bags, doors, or windows. A manual emergency alarm and built-in LED flashlight add extra security and everyday convenience. Powered by a rechargeable battery, it delivers up to six months of standby time with automatic power-off. Its ultra-light 18.4 g design ensures easy portability on keychains or travel bags.

Advanced Infrared Privacy Protection

Detects hidden cameras in dark or low-light environments using infrared technology combined with optical filtering for reliable identification of concealed surveillance devices during travel or daily use.

High-Visibility Red Light Detection System

Uses optimized red LED scanning modes to clearly expose hidden camera lenses by reflection, improving detection accuracy across hotel rooms, rental apartments and changing rooms.

Silent Visual Scan Mode

Enables discreet camera detection using visual indicators without triggering alarms, ideal for private or professional environments where silent operation is preferred.

Dual-Function Safety & Anti-Theft Design

Functions as both a spy camera detector and a vibration-based anti-theft alarm, delivering loud alerts when motion is detected on doors, windows or personal belongings.

Long Standby Rechargeable Battery

Efficient Li-Polymer battery provides up to six months of standby time with automatic power-off, ensuring reliable protection without frequent recharging.

Multi-Purpose Emergency Utility

Includes a manual emergency siren and integrated LED flashlight, offering added safety, visibility and peace of mind in unfamiliar or risky environments.

Specifications:

Input Rating	: DC 5 V / 0.12 A
Battery Type	: Li-Polymer
Battery Capacity	: 60 mAh
Flashlight Brightness	: 1 lumen
Speaker Diameter	: 5.2 mm
Sound Output	: 80 dB
Standby Time	: Up to 6 months
Charging Time	: Approx. 60 minutes
Operating Time	: Up to 60 minutes
Dimensions	: 26 × 55 × 20 mm (L×W×H)
Weight	: 18.4 g
Material	: PC

Packaging Content:

- InfraSense
- USB-C Cable
- Lanyard
- Quick Guide

Certifications:

**LED
Flashlight**
