

VENTED OUTDOOR FREESTANDING CABINETS - IP45

DESCRIPTION

The DYNAMIX Outdoor Freestanding Cabinet is designed to house & protect network, security & electrical equipment in exposed outdoor environments. Built with a rain hood, filtered ventilation, internal mounting rails & a lockable front door, it provides a secure & practical enclosure for outdoor installations. The cabinet uses a natural wind-cooling design with front-door filtered vents, ventilation under the rain hood lip & four serviceable fans positioned under the pivoting rain hood for improved airflow. Internal fixings, adjustable 19" mounting rails & sealed cable gland entries make it suitable for structured outdoor equipment installations.

FEATURES

- Outdoor freestanding cabinet for external equipment installations
- Angled rain hood helps direct water away from the cabinet
- Vents positioned under the rain hood lip for improved airflow
- Filtered vents on the front door support natural wind cooling
- Four fans fitted under the top rain hood for additional cooling
- Fans are serviceable by lifting the pivoting rain hood
- Lockable front door for added security
- Internal front door dust filters for easy servicing & cleaning
- 25mm double-wall cavity door construction
- Adjustable 19" mounting rails fitted front & rear
- Internal fixings provide a secure installation
- Sealed cable gland plate entry x2
- Cast iron plinth base
- Front door rubber seal
- Available in Grey & Forest Green
- Stainless steel 316 available on request
- Protection rating: IP45 EN60529/10.91
- Includes 10x cage nuts
- 2 year cabinet warranty, subject to correct loading, operation & installation conditions
- 1 year fan warranty
