Wireless 1080p HDMI Transmitter with Dual Receivers (V1711A)

Supports Dual Screen Mirroring up to 50M.

Description:

UNITEK Wireless 1080p HDMI Transmitter with Dual Receivers is a sleek and compact wireless HDMI display kit that features dual screen display capabilities. It enables stable high-definition 1080p video transmission without any software installation. Whether used in conference rooms, digital signage, or home entertainment systems, it delivers a smooth, low-latency audio-visual experience.

Product Features:

- **50m Range for Unmatched Flexibility:** Supports up to 50 meters in open areas with 1080p@60Hz dual screen video display and synchronized audio. The transmitter and receivers are powered by a USB-C connection with a blue LED light indicating power. The transmitter's HDMI input can be converted to a USB-C input by connecting a USB-C to HDMI adapter (included). It is easy to connect USB-C devices that support video, such as tablets, mobile phones, or laptops without HDMI output.
- **Supporting up to 4 Receivers:** It supports a maximum of one-to-four screen displays, allowing you to connect more screens by simply adding and pairing additional receivers. Users can purchase an additional HDMI Receiver (V1711F) for extra screen displays if necessary.
- **Easy pairing:** Experience effortless setup with our plug-and-play feature for first-time connections. If the connection fails, simply press and hold the top button on both the transmitter and receiver for 3 seconds. The Tx blue LED will blink, and the screen (with the Rx connected) will display that it is in pairing mode. Once the transmitter and receiver are successfully connected, the blue LED will remain lit.
- **Screen Rotation:** Effortlessly rotate the screen orientation with a single press of the top button on the receiver side (90°, 180°, 270°, and 360°). This feature is perfect for transitioning to portrait mode displays, ensuring a seamless viewing experience.
- **Secure & Plug-and-Play:** Supports HDCP 1.4 and WPA3 security protocols. Compatible with Windows, macOS, and Linux. No drivers needed.
