Description:

UNITEK Wireless HDMI Receiver is an additional receiver for the Wireless 1080p HDMI Transmitter (V1711A). It supports 1080p HD wireless audio and video transmission, allowing 1 transmitter to connect to up to 4 receivers. Enjoy vertical screen mode and 50m low-latency transmission, making it perfect for meetings, advertising displays, TVs, and projectors.

Product Features:

- **50m Range for Unmatched Flexibility:** Supports up to 50 meters in open areas with 1080p@60Hz video display and synchronized audio. This receiver is powered by a USB-C connection, with a blue LED light indicating power. It supports any monitors with HDMI input.
- **Extra Screen Display:** This product functions as an extra receiver and connects to the V1711A transmitter. It supports a maximum of 2 additional screen displays with the V1711A transmitter/receiver kit, allowing you to connect more displays by simply adding and pairing additional receivers.
- **Easy pairing:** Just press and hold the top button for 3 seconds on both the transmitter and receiver. The Tx blue LED will then blink, and the screen (with the Rx connected) will indicate that it is in pairing mode. Once the transmitter and receiver are connected, the blue LED will remain lit.
- **Screen Rotation:** Effortlessly rotate the screen orientation with a single press of the top button on the receiver side (90°, 180°, 270°, and 360°). This feature is perfect for transitioning to portrait mode displays, ensuring a seamless viewing experience.
- **Secure & Plug-and-Play:** Supports HDCP 1.4 and WPA3 security protocols. Compatible with Windows, macOS, and Linux. No drivers needed.
